CLASSIC QUARTZ CARE KIT

Maintenance care kit for quartz engineered worktops.

DIRECTION FOR USE:

1

STONE CLEAN

Multipurpose neutral detergent ideal for pre cleaning all surfaces.

Ready to use product.

Spray the detergent onto the surface and clean using one of the white cloths provided. Once the surface is clean, it is most important to rinse any excess residue left with clean water and paper tissue cloth.

2

WIPE & GLOSS

Cleans and revives shine on polished surfaces.

Shake bottle well before use. Spray **Wipe & Gloss** onto work surface and in circular motion using white cloth provided buff and wipe off. If required use rubber gloves provided to avoid any possible skin irritations. (Not suitable for honed / matt surface finishes or floor areas)

3

NANO CREAM CLEANER

Abrasive paste cream for daily or weekly cleaning.

Specially developed paste using tiny particles that penetrate into the small superficial pores where normal detergents cannot reach. Will remove all types of stubborn surface organic lime scale and permanent marker pen marks. Used regularly will help prevent lime scale and general soiling build up on your work top. Use a damp cloth to remove any excess surface dirt and grime. Pre wet surface with water to create a slight damp effect not soaking wet. Apply Nano Cream paste to surface and proceed to agitate using white scouring pad in circular motion until clean. Where surfaces have not been cleaned for some time or proving more difficult to clean we recommend repeating same cleaning procedure or using Nano Cream pure without adding any water. After every clean rinse thoroughly with clean warm water using cloth provided to remove all excess dirt and paste residue. If necessary as in the case of marker pen residues you can apply Nano Cream neat on the surface mark and leave for approximately 24 hours and then as before rinse thoroughly with clean warm water.

It is the responsibility of the end user to determine the correct precautions for the safe handling and use of our products based upon our advice. You must familiarise yourself with the correct application and usage instructions indicated on the label of each bottle. Technical advice whether verbal or in writing or by way of trials are given in good faith but without warranty. The application use or processing of the products are beyond our control and should be tested for their suitability and therefore your own responsibility. In no event shall Classic Quartz Stone be liable to the customer or anyone else for incidental or consequential damages however occurred.

ALWAYS TEST FIRST.
